DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "front-rear" and "up-down" are unclear.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3616

4. Claims 6 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Enders (6,846,010).

Enders teaches a head protecting airbag device comprising an airbag folded in the upper edge of windows inside a vehicle in undeployed condition; an inflator; a window-ward shielding portion; a roof-ward shielding portion; a joint port disposed in the upper edge of the windows and a cover portion for covering the vehicle's inner side of the inflator upon deployment. The airbag comprises a plurality of mounting portions at the upper edge of the window-ward shielding portion wherein the mounting portions are disposed in the area of the roof-ward shielding portion and have slits in the upper periphery thereof.

Allowable Subject Matter

5. Claims 1,4 and 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

6. Applicant's arguments filed July 22, 2005 have been fully considered but they are not persuasive. With respect to claims 6 and 7, the reference clearly teaches the claimed structure.
